Building a chatbot :

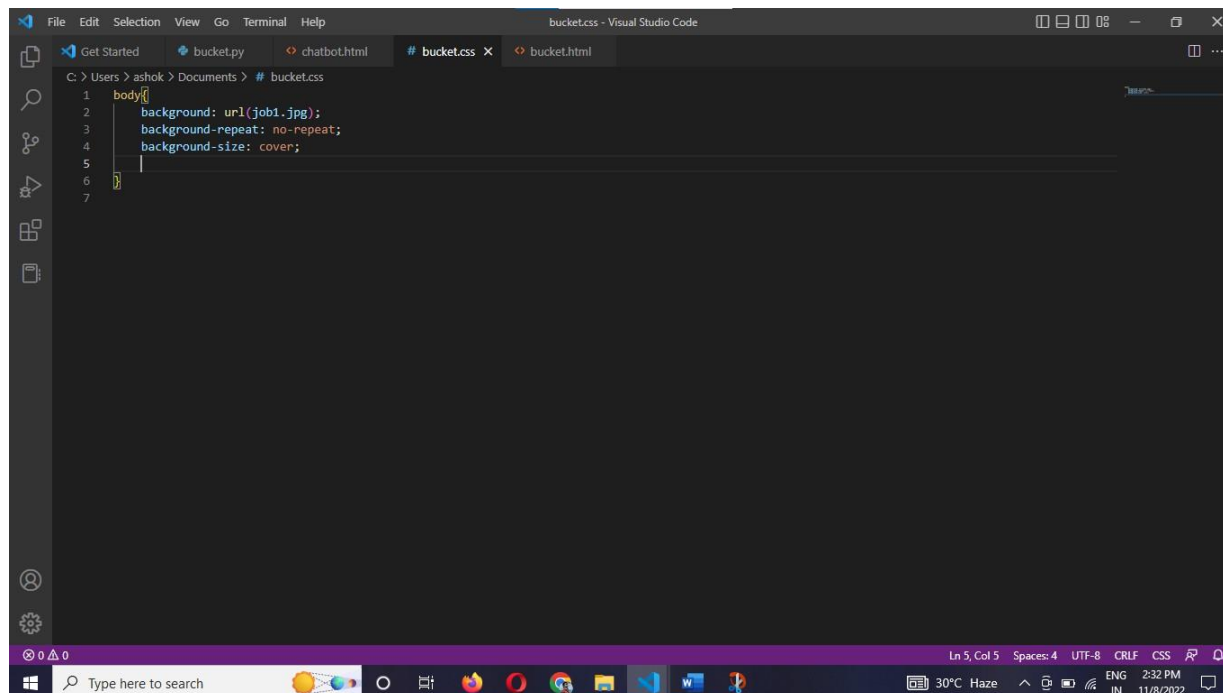

Integrate To Application :

The screenshot shows a Visual Studio Code editor with a file named `index.html` open. The code is an HTML document with a title "SKILL AND JOB RECOMMENDER" and a link to `kavi.css`. The main content area contains a welcome message and a script that initializes the Watson Assistant chat interface. The script sets the `IntegrationID` to "0f785e60-419e-492c-8db8-2fbcc59ac0fb", the `region` to "au-syd", and the `serviceInstanceID` to "ab6b3a69-25e3-4296-8af4-cca7acf802d9". It also sets a `timeout` of 10000 milliseconds and a `clientVersion` of "1.0.0". The script uses the `WatsonAssistantChatOptions` object to configure the chat interface.

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>SKILL AND JOB RECOMMENDER</title>
5     <link rel="stylesheet" href="kavi.css">
6   </head>
7   <body>
8     <h2><center>WELCOME TO JOB PORTAL FOR BRIGHT FUTURE</center></h2>
9     <script>
10      window.watsonAssistantChatOptions = {
11        integrationID: "0f785e60-419e-492c-8db8-2fbcc59ac0fb", // The ID of this integration.
12        region: "au-syd", // The region your integration is hosted in.
13        serviceInstanceID: "ab6b3a69-25e3-4296-8af4-cca7acf802d9", // The ID of your service instance.
14        onLoad: function(instance) { instance.render(); }
15      };
16      setTimeout(function(){
17        const t=document.createElement('script');
18        t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" + (window.watsonAssistantChatOptions.clientVersion || 'latest') + "/WatsonAssistantChat.min.js";
19        document.head.appendChild(t);
20      });
21    </script>
22  </body>
23 </html>
```

The screenshot shows a Visual Studio Code editor with a file named `bucket.css` open. The code defines the background for the chat interface, setting the `background` to `url(job1.jpg)`, `background-repeat` to `no-repeat`, and `background-size` to `cover`.

```
1 body{
2   background: url(job1.jpg);
3   background-repeat: no-repeat;
4   background-size: cover;
5 }
6
7
```

OUTPUT:

Watson Assistant Chatbot Output
